

Kompetenzstrukturmodell Mathematik

The diagram illustrates a competency structure model for mathematics. It features a large rounded rectangle with a thick black border. Inside this rectangle, centered, is a smaller rounded rectangle with a thin black border. This inner rectangle contains four horizontal lines and two vertical lines. The two vertical lines are positioned on the left and right sides, and the four horizontal lines are positioned in the center, creating a grid-like structure. This structure likely represents a framework for organizing mathematical competencies.
